Works With Any Web Browser

The best "keypad" is in your audience's pocket.

The system is designed to work beautifully in any Web browser-capable computing machine. So, whether your audience members use a smartphone, tablet, or a laptop, it works.

No downloads of event apps, no proprietary keypads, ever.

Question and Answer

Because questions matter.

Empower your audience to speak up and be heard. Let your audience ask and vote for questions that interest them. Address the ones with more votes.
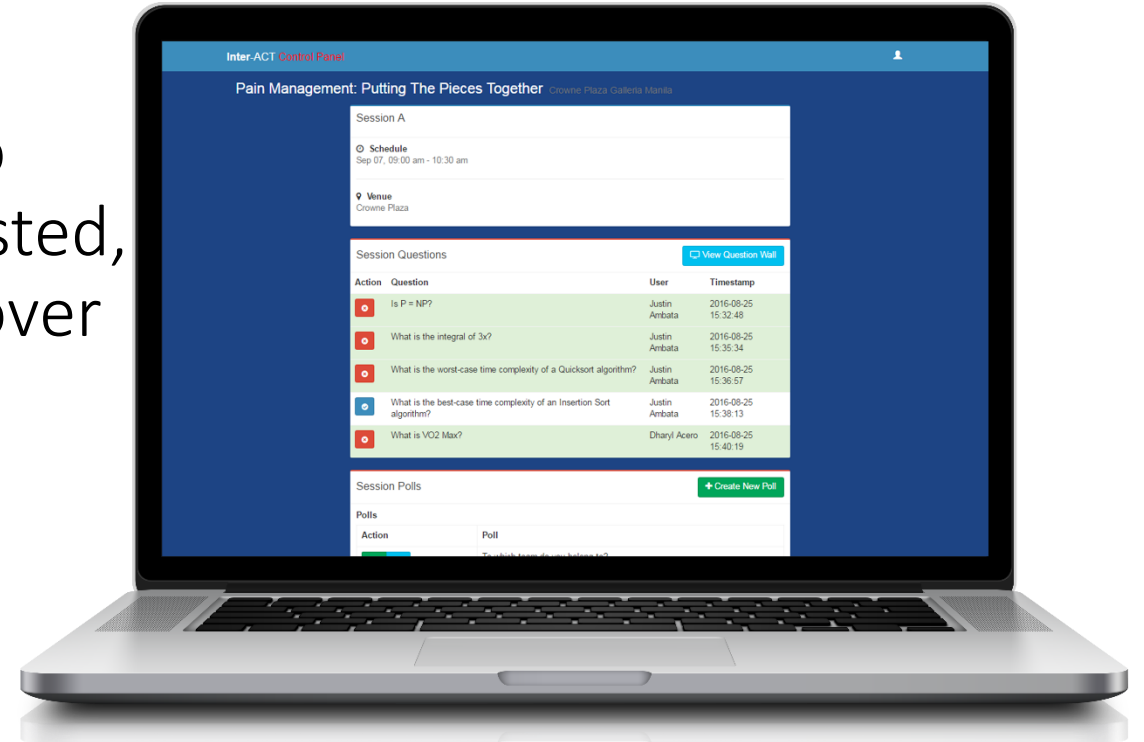

Ask or Vote

Audience members can easily post questions to speakers anonymously or with their identity. Questions posted can be voted on by others in the audience, easily helping speakers to identify popular questions or topics to discuss.
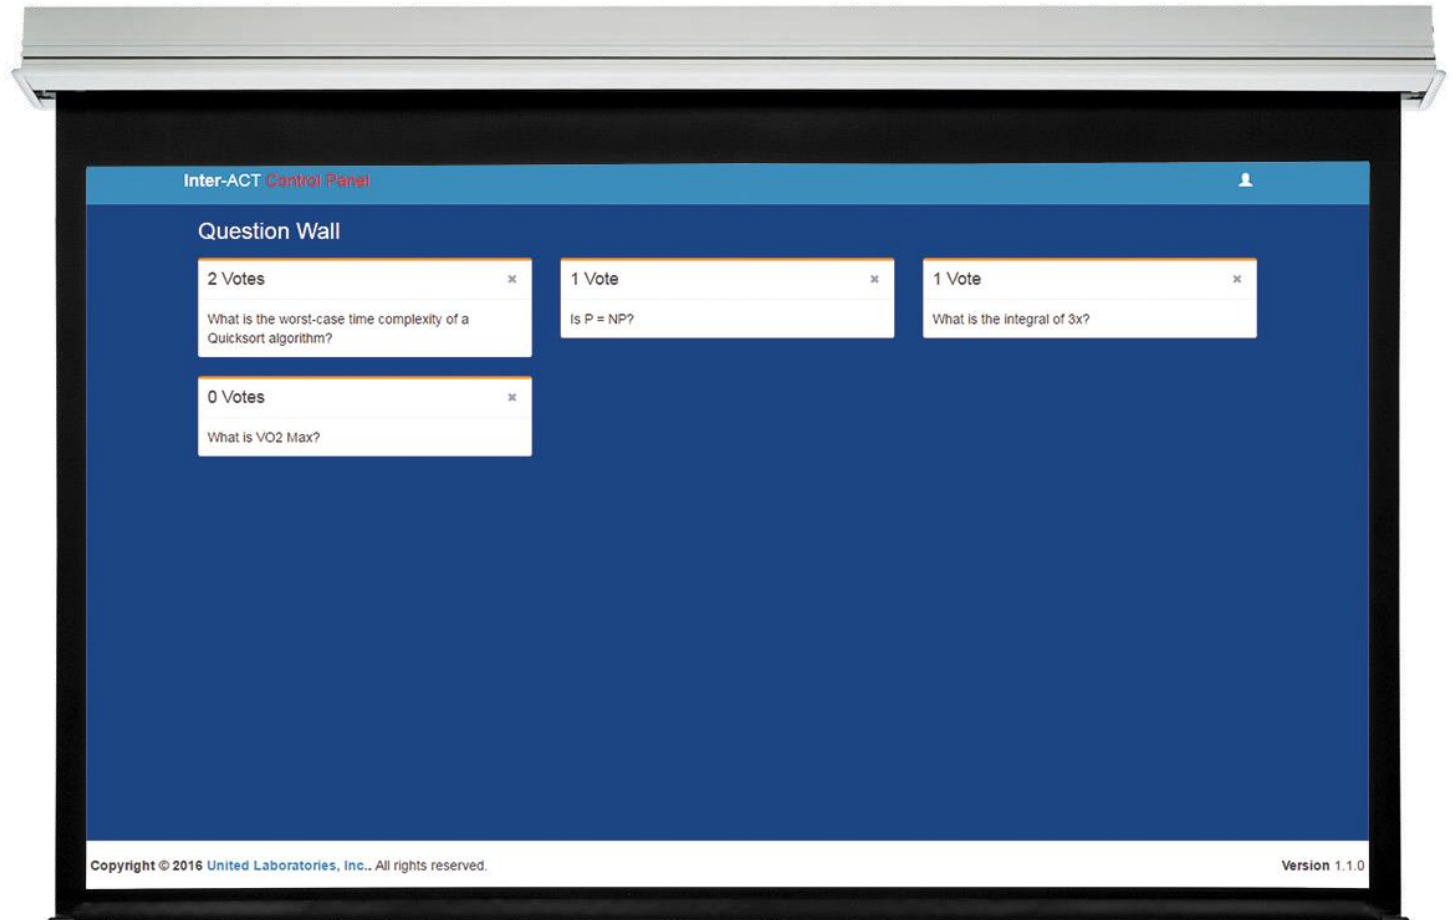

Curate the content posted

To help the audience to focus the discussion on specific topics and to ensure the quality of questions posted, organizers have complete control over all user submissions with question filtering enabled.

Question wall

Project a live display of the questions. As attendees vote on the questions, questions get re-sorted.

Anonymity

Attendees are anonymous by default. This helps promote open dialogue between stakeholders by enabling questions that matter to be asked.

Attendees can identify themselves before posting a question by unchecking the "Post As Anonymous" option.
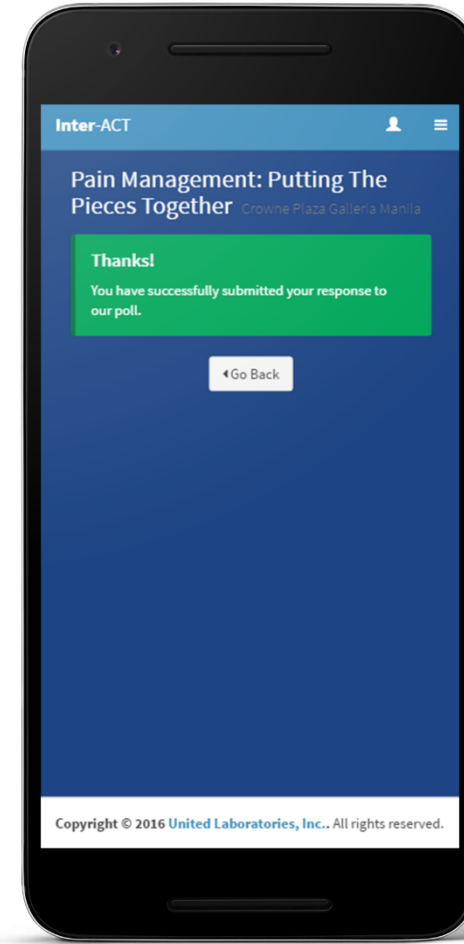

Audience Poll

Do you have multiple choice questions you wish to ask the audience?

Find out what they think. Poll them for their opinions and see the results display in beautiful charts in real-time.
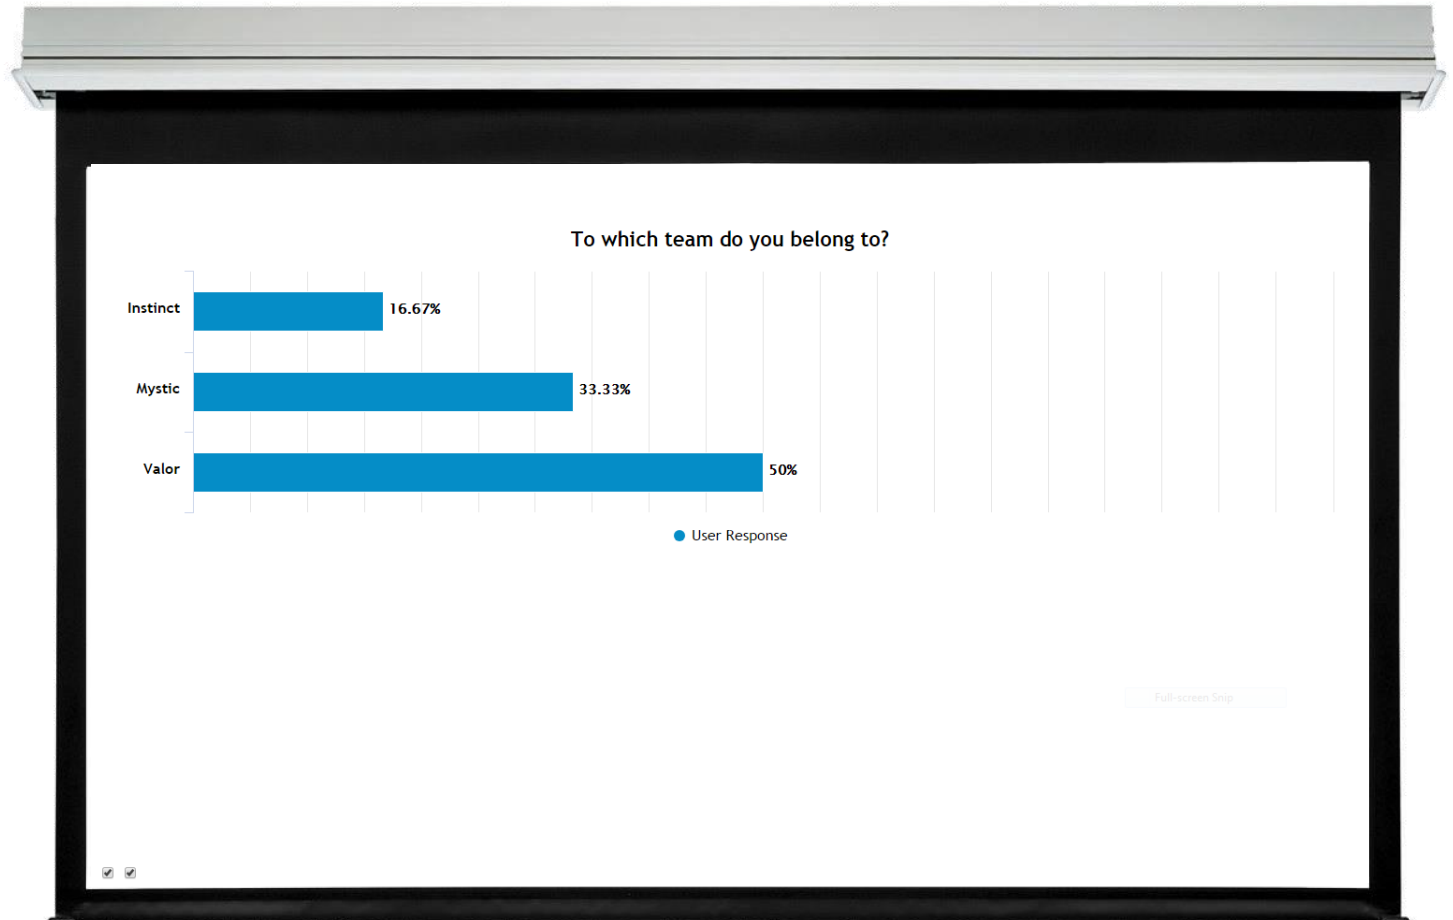

No additional hardware required

It's quick, simple, fun, and does not require any special voting devices. With a simple tap of a button on your audience's smartphones, your audience will be able to participate in the poll.

Beautiful, real-time charts

See the results displayed on beautiful bar charts in real-time.

Screens

Some screens of the web application.

Sign in

The landing page of the web application.

For pre-registered users, they'll simply type in their sign in credentials.

Home

This page displays the list of features and sessions (schedule) of the event.

The sessions are ordered based on how the organizers configured it.

Session Details

This page displays all information regarding a selected session such as the schedule and its venue.

Session A

🕐 **Schedule**

Sep 07, 09:00 am - 10:30 am

📍 **Venue**

Crowne Plaza
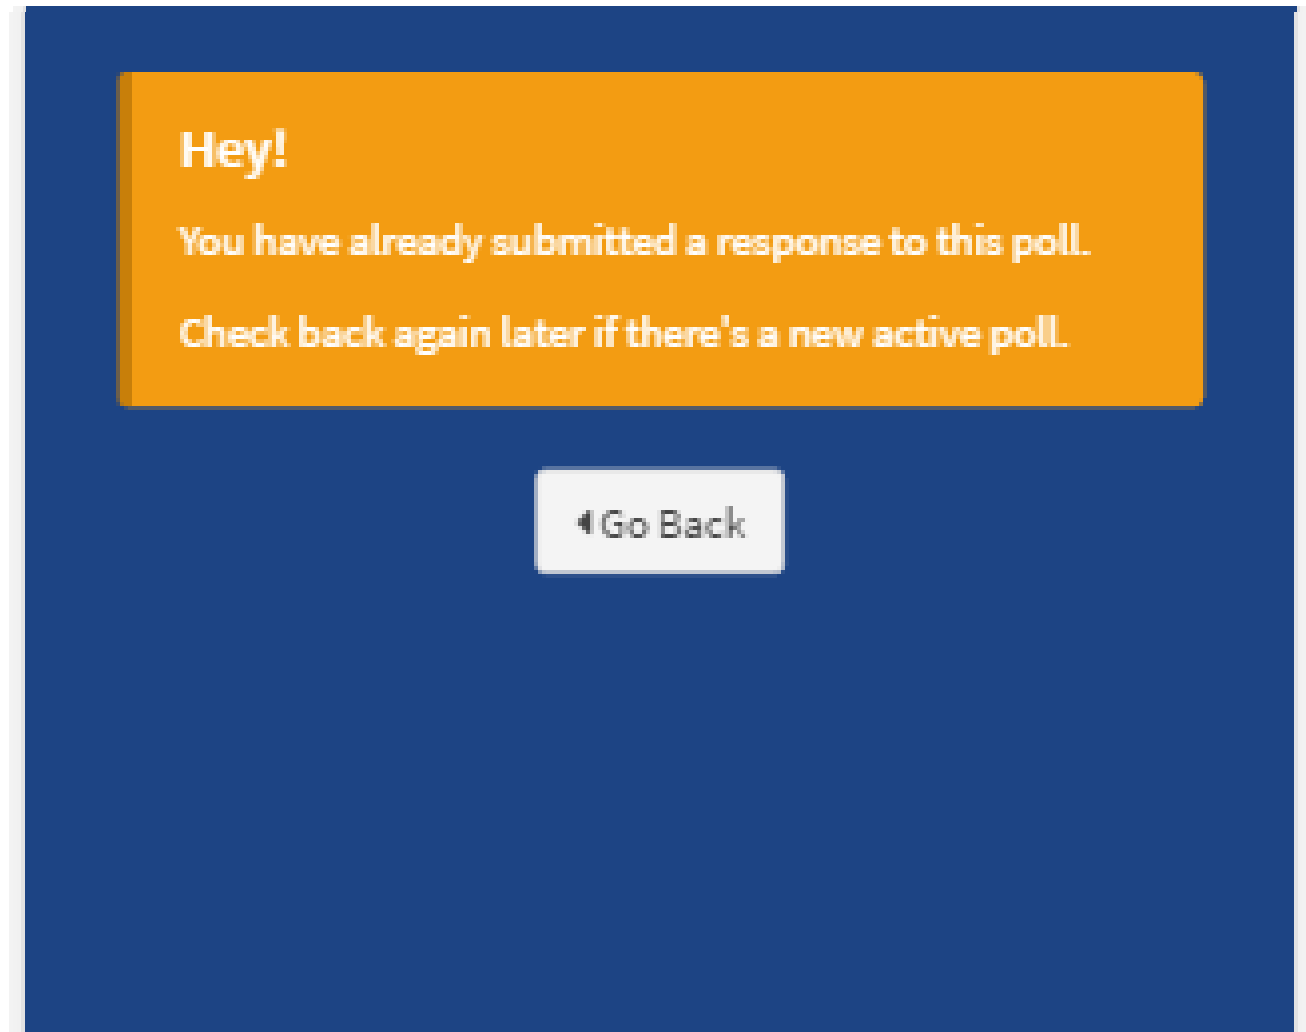

◀ Go Back

Poll

There will be at most one (1) active event poll at a time.

In order for the audience to submit their response, they would need to simply tap/click the choice they would like to submit. A confirmation message will be shown to the user after he has submitted his response.

If a user tries to submit a second response to the same poll, a notification message will be displayed refraining him to submit multiple responses for the same poll.

Hey!

You have already submitted a response to this poll.

Check back again later if there's a new active poll.

◀ Go Back

Ask

Audience can submit their questions to the organizers/speakers and vote for other users' questions in this page.

Equipment Checklist

1 × Projector Panel/Screen

1 × Laptop with internet connection
(LAN line recommended)

2 × Tablets with internet connection
